

Lab Support, a division of On Assignment, is a recognized leader in the scientific staffing industry. Since 1985, our sole focus has been to place scientific professionals at all career levels in contract, contract-to-hire and direct hire positions. With a reputation for one-to-one career counseling and a track record that includes the placement of over 200,000 scientists, Lab Support has built a reputation as one of the best in the business.

Lab Support is supported by a nationwide network of branches serving all major markets, international branches in Europe, relationships with leading scientific companies and over 20 years of experience putting *People First!*

Lab Support has an immediate opening for a BioStatistician. You will join a small group of statisticians to provide statistical support to the non-clinical areas, such as Research, Drug Safety Research & Development, and the department of Pharmacokinetic, Dynamic and Metabolism.

You will outreach the scientists in research area to work with them on statistical issues. Some examples are:

- Analyze the data with appropriate statistical methods, write summary reports and present orally.
- Resolve design issues and determine the sample size.
- In vivo- in vitro bioassay development / validation as markers of preclinical drug activity, safety testing and product release.
- Monitor literature for new statistical methodology and apply or adapt as appropriate.
- Increase knowledge relating to subject areas.
- Develop and deliver statistical training modules to meet the needs of scientific lines.

Requirement:

Solid and broad statistical knowledge, excellent consulting/communication skill and ability to work independently are essential. Must know generalize linear model, and SAS, knowledge of R and strong background in experimental design is a plus. Ph.D. in statistics or biostatistics with 0-3 years of experience is required. Preference will give to the candidate with knowledge of biology or biochemistry.

For immediate consideration, please email your resume to [quynh.nguyen@onassignment.com](mailto:quynh.nguyen@onassignment.com). At this time, only local candidates will be considered. We look forward to hearing from you!
